

Site Survey for Espresso Machine Installation

Adequate dimensions and strength of work surface, for machine and grinder. Check height, including grinder bean hopper and on top of knockout drawer if necessary, width and depth.

Expobar Elegance:

Overall depth:	600mm
Back of machine to front of front foot:	460mm
Back of back foot to front of front foot:	410mm

Synchro:

Overall depth:	593mm
Back of machine to front of front foot:	550mm
Back of back foot to front of front foot:	490mm

Power supply within 1 metre of machine, check wattage required for equipment and 1 socket for each appliance.

Water supply within 1 metre of machine with washing machine fittings, either 3/8 inch for espresso machine or 3/4 inch for CTU water filter.

Waste below machine, if not available a bucket for waste to run into. (ideally with completely vertical drop to allow water to run away freely). The hole needs to be located centrally under the espresso machine and with a diameter of 50mm.

Sufficient space for 5 or 10 litre CTU water filter to be located between machine and water supply

CTU5	H 380mm x W 170mm
CTU10	H 490mm x W 222mm
